

New Dust Cap for AdBlue®

Couplings for safe transfer of AdBlue®

TODO-MATIC® Dry-Break® couplings offer increased safety benefits and foolproof design, this combination results in a simple, fast and environmentally friendly solution when considering product transfer logistics.

For these reasons leading manufacturers of AdBlue® have chosen to install the 2" and 3" TODO-MATIC®

Dry-Break® couplings for their bulk transfer applications. As an added feature we now offer for the 2" tank unit, a rubber dust cap in a distinctive blue colour to visually identify the couplings for AdBlue®.

TODO recommend the use of dust caps for all tank units to prevent the ingress of dirt/dust which can reduce seal life and coupling wear.

2" Dust cap. Article no. 3666B-10.

2" Tank unit with dust cap. Article no. 5002B-4408.

2" TODO-MATIC® Dry-Break coupling (tank unit) and the new 2" dust cap in blue colour.
